PRICE
- Paid
- Free

Most Steam games are priced under **$10**, with a strong dominance of **paid games (~82%),** while **free-to-play** titles make up a smaller but **significant portion.**

Price Distribution of Steam Games

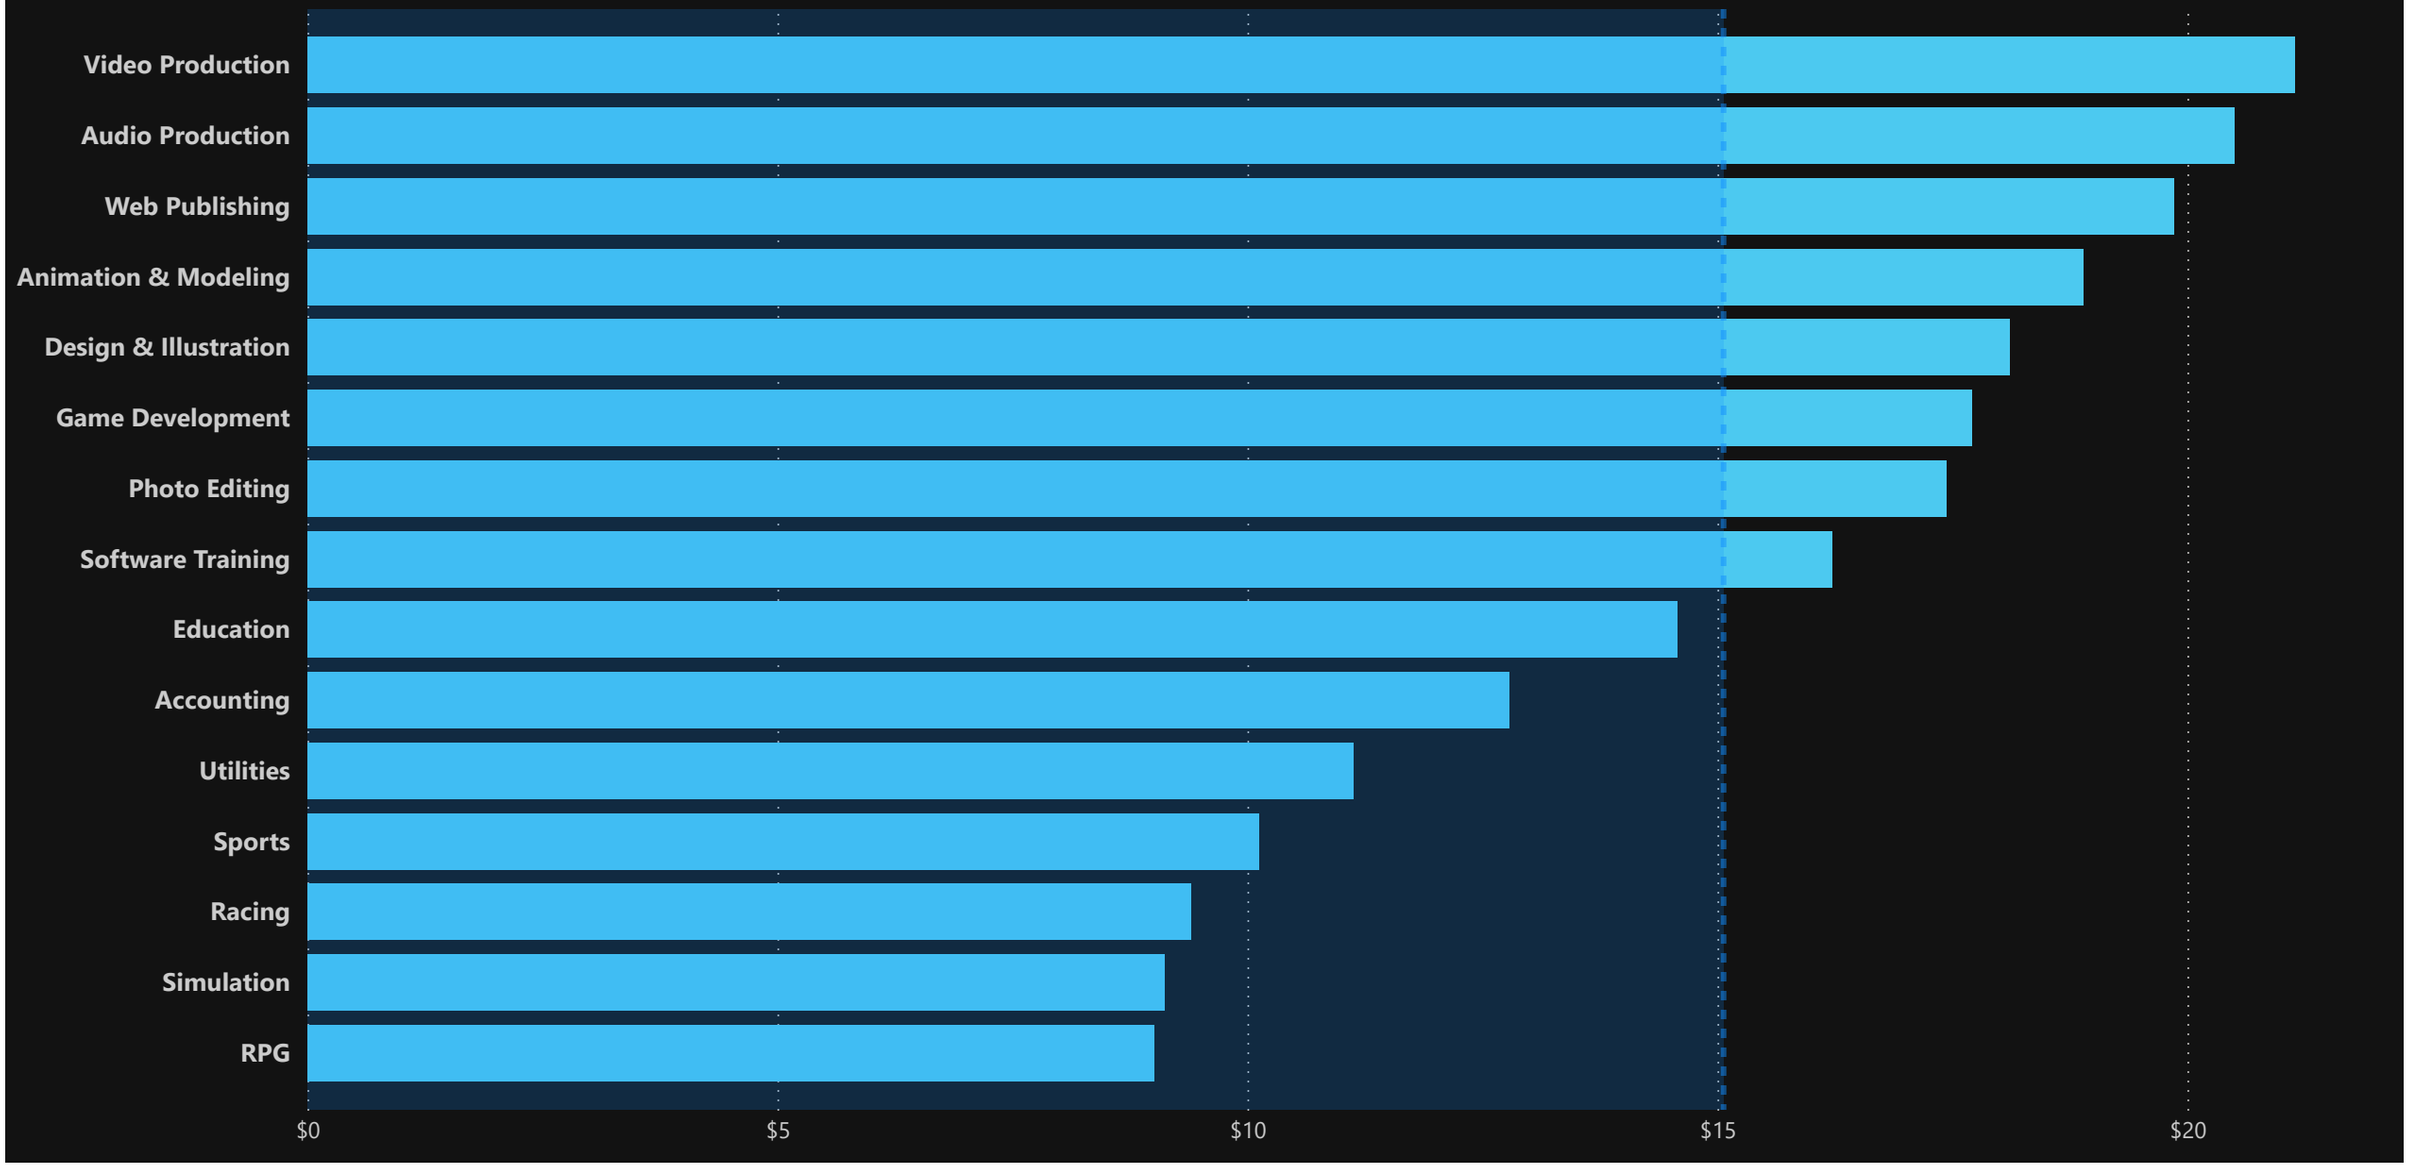
Distribution of game prices highlighting dominant low-cost segments and rare premium outliers.

Top Priced Games (Outliers Analysis)

These games are priced significantly higher than the market average (~₹200–₹300), indicating premium or niche positioning.

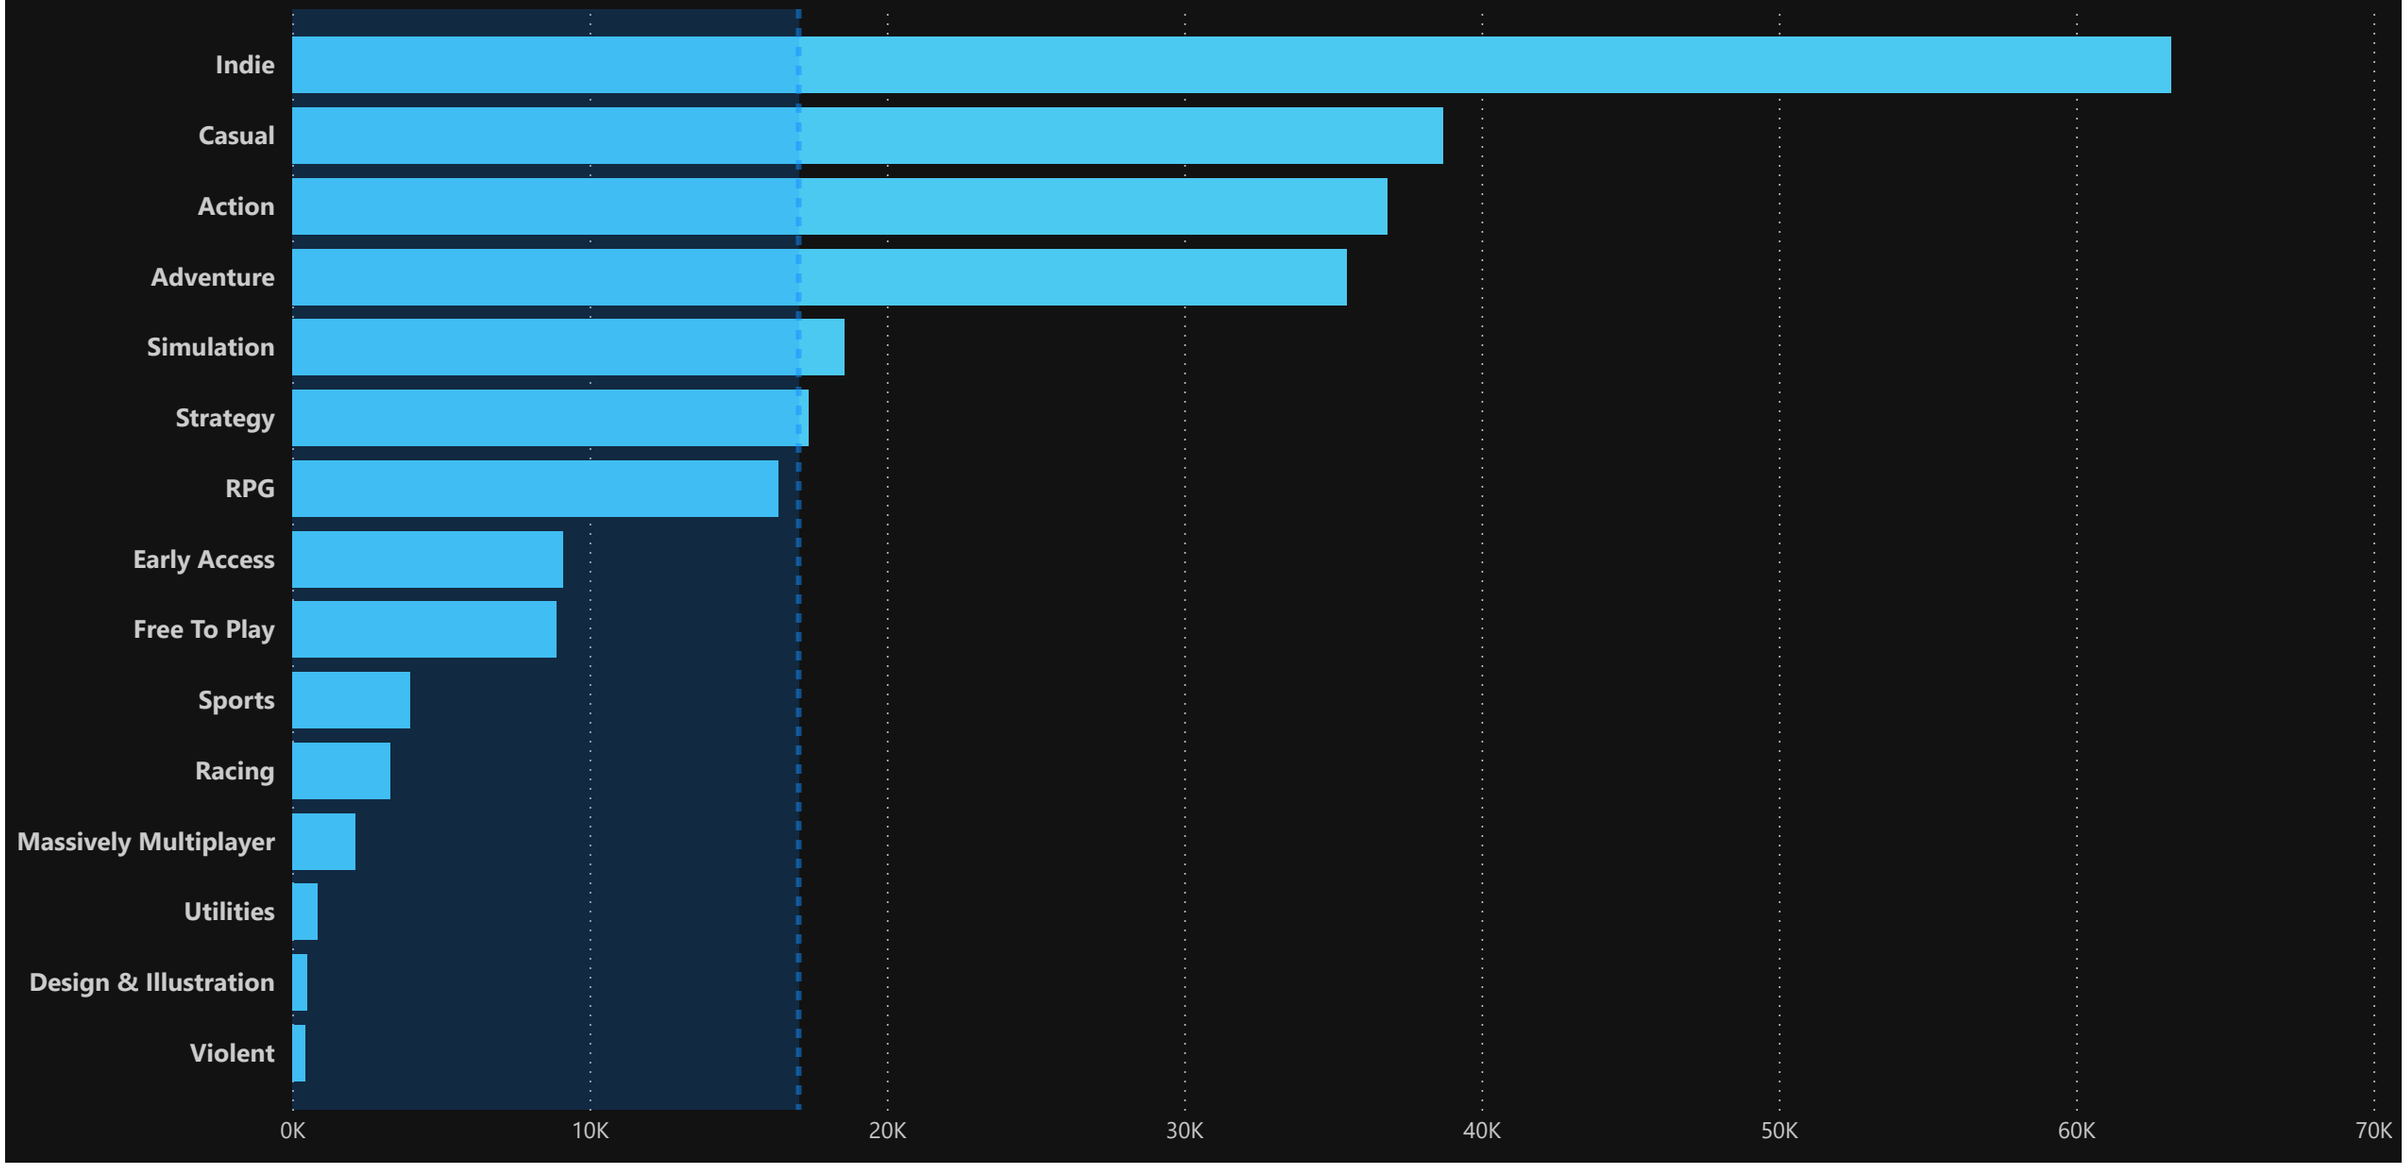
Average Game Price by Genre

Professional and creative software categories command the highest prices, while traditional game genres like RPG and Simulation remain more affordable.



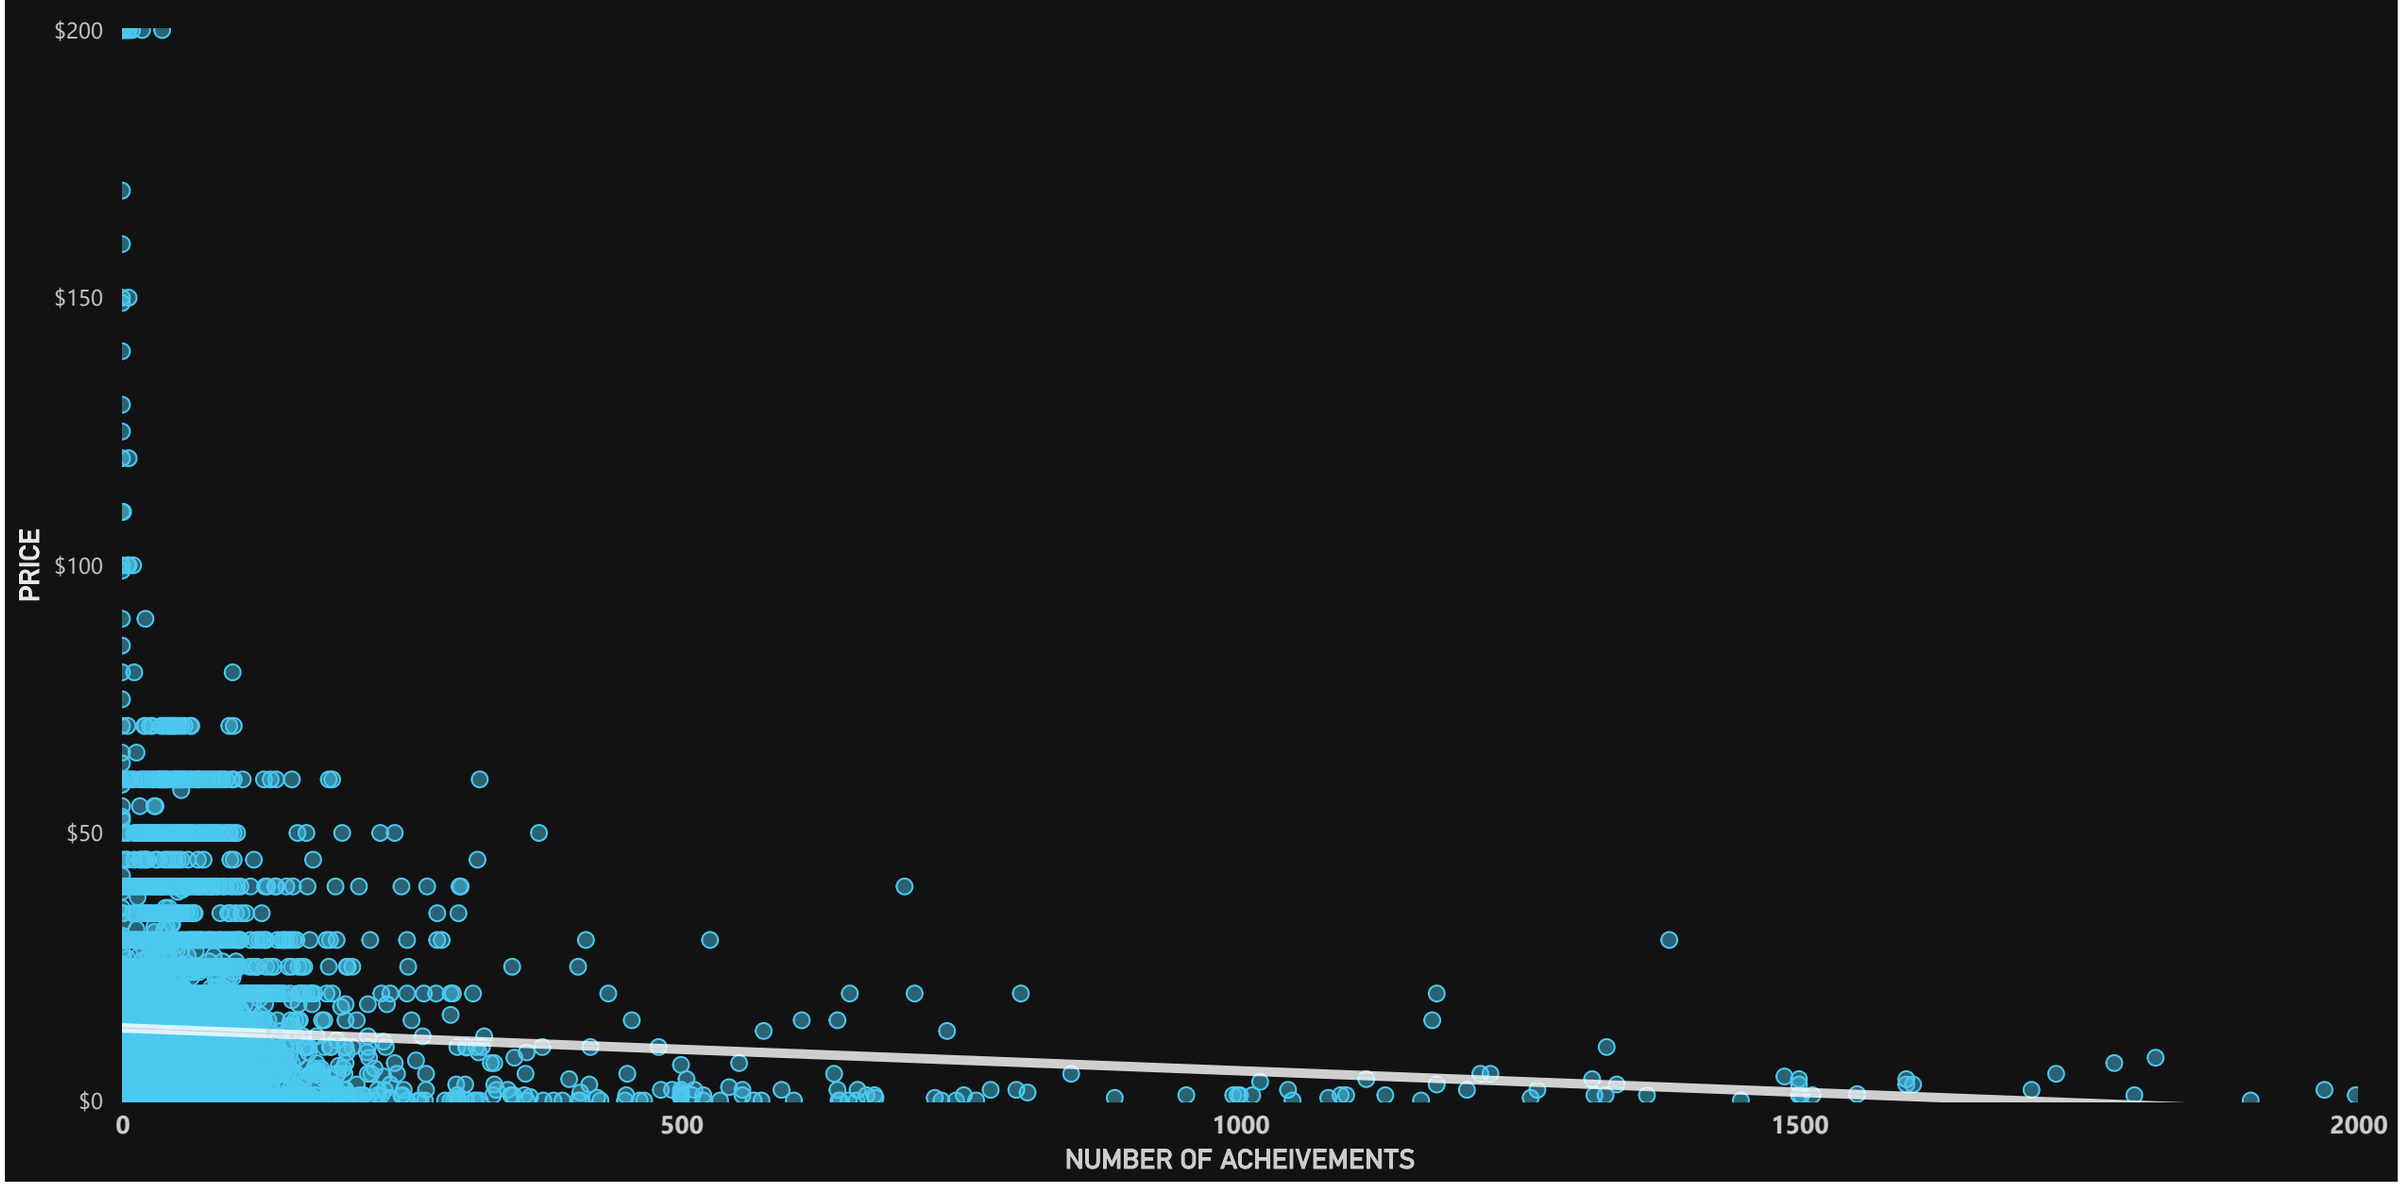
Genre Popularity on Steam (Number of Games)

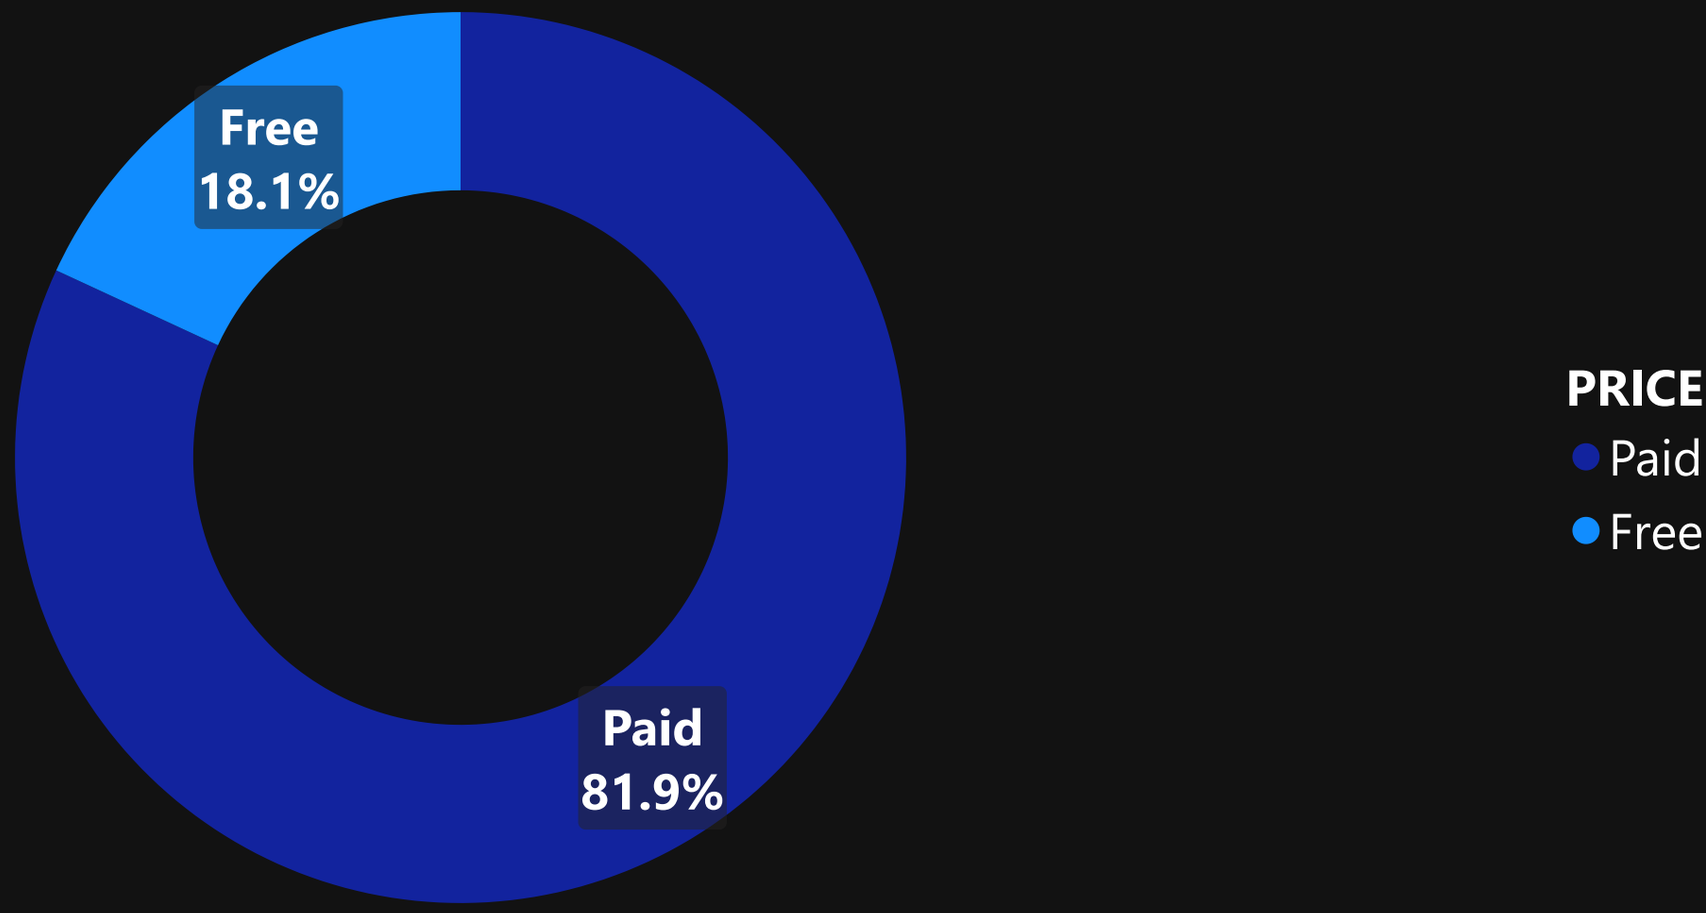
Indie, Action, and Adventure dominate the Steam ecosystem, reflecting a high volume of accessible and low-cost game production.4



Achievements vs Price (Relationship Analysis)

Higher achievement counts do not correspond to higher prices, indicating that content volume does not directly drive pricing in the Steam market.



Free vs Paid Games Distribution


Paid games dominate the platform, accounting for over 80% of total titles, while free-to-play games represent a smaller but significant segment.
